*Sub E*  
C 12. (Currently Amended) A method of making a anti-laceration automobile side window glazing comprising adhering two sheets of glass adapted to fit an automobile side window with an intercalary adhesive layer, wherein

said intercalary adhesive layer has a thickness of more than 0.76 mm;

each of said two sheets of glass has a thickness of from 1.5 to 3 mm; and

each of said two sheets of glass has a core compressive stress in the central zone ranging from 20 to 50 MPa.

13. (Previously Added) The method of Claim 12, wherein said anti-laceration glazing has anti-laceration properties in the non-intact state.

14. (Previously Added) The method of Claim 12, wherein said anti-laceration glazing has anti-laceration properties in the non-intact bent state.

Sub  
E17

15. (Previously Added) The method of Claim 12, wherein said intercalary adhesive layer has a thickness of not more than 2 mm.

16. (Previously Added) The method of Claim 15, wherein said intercalary adhesive layer has a thickness of not more than 1.90 mm.

17. (Previously Added) The method of Claim 15, wherein said intercalary adhesive layer has a thickness of not more than 1.53 mm.

18. (Previously Added) The method of Claim 12, wherein said intercalary adhesive layer is composed of one or more layers of plastic, wherein said plastic is selected from the group consisting of polyvinylbutyral, polyurethane, RIM polyurethane, polycarbonate, poly(methyl methacrylate), polypropylene, ethylene-vinyl acetate copolymer, cycloolefinic copolymer, polyethylene, thermoplastic polyester, unsaturated heat-hardening polyester, acrylic resin, and vinyl chloride-glycidyl methacrylate copolymer.

19. (Currently Amended) The method of Claim 18, wherein said ~~plastic is a~~ polyurethane, ~~which~~ is a thermoplastic polyurethane.

20. (Currently Amended) The method of Claim 18, wherein said ~~plastic is a~~ polyethylene, ~~which~~ is in the form of a ionomer resin.

21. (Previously Added) The method of Claim 20, wherein said ionomer resin is a (meth)acrylic acid and ethylene copolymer.

22. (Currently Amended) The method of Claim 18, wherein said ~~plastic is a~~ thermoplastic polyester, ~~which~~ is a poly(ethylene terephthalate).

23. (Canceled)

24. (Canceled)

25. (Canceled)

Sub  
E1  
26. (Previously Added) The method of Claim 12, wherein said anti-laceration glazing comprises at least one functional layer.

27. (Previously Amended) The method of Claim 12, wherein at least one of the outer faces of the anti-laceration glazing comprises a plastic sheet.

C  
28. (Previously Amended) An anti-laceration automobile side window glazing produced by the method of Claim 12.

29. (Previously Amended) An automobile comprising the anti-laceration automobile side window glazing of Claim 28.
